

NEWSWORTHY - JULY 2009

COMPREHENSIVE AND EFFICIENT MEDICAL CARE FOR THE YOUTH OF THE WORLD

"It's an exciting time to be living," Dr. Martina Fuchs explained to me today. I do certainly agree. We are in the transition to Phase 3 of human history, and in 10-15 years the world will be a totally different place. Of course, I could be wrong about being in this historic transition, but I doubt very much that I am. My record as a "scientist" is a pretty good one, and I am confident that growing numbers of serious and highly educated people around the world are beginning to understand what I am talking about. I do not like the word "scientist" because I think the word is horribly overused. Most men working in science today do not know what they are talking about – they are mostly dealing in forms of ideology and religious belief.

We do have a lot of knowledge, but much of this knowledge is fake and useless, it is pretty much nonsense. Medical science is one example. Our modern medical science is deeply flawed. Much of it, even up to 75%, may simply be a fraud. This past month, in June 2009, I published an article in **WAM** outlining what I believe are the four true foundations of medicine, a medicine of the future.

THE SCIENCE OF THE PLACEBO EFFECT

THE SCIENCE OF "SOCIAL CONNECTION"

THE SCIENCE OF NUTRITION AND PHYSICAL TRAINING

THE SCIENCE OF MEDICAL INTERVENTION

The title: THE FOUR PILLARS OF MEDICAL SCIENCE

The URL: <http://worldaffairsmoonthly.com/pdf/june09publishersnote.pdf>

Months back, in July 2008, I had explained in **WAM** the first of these four, which is the science of the placebo effect.

The title: REBUILDING MEDICINE ATOP A FOUNDATION OF THE PLACEBO RESPONSE

The URL: <http://worldaffairsmoonthly.com/printfriendlybyid.php?id=1005>

In December 2008 I explained the second of these four, which is the science of "social connection."

The title: THE KILLER CALLED LONELINESS

The URL: <http://worldaffairsmoonthly.com/printfriendlybyid.php?id=1108>

And in May 2008 I described the third, which is the science of nutrition and physical training.

The title: JUNK FOOD = GLOBAL OBESITY PANDEMIC

The URL: <http://worldaffairsmoonthly.com/printfriendlybyid.php?id=970>

There is of course a fourth, the science of medical intervention. I will soon write an article outlining my views of this science. But I am certain that these are the four pillars of medical science, a future medical science. When we do medicine correctly – and we will – we will be “doing” medicine with these four sciences.

What is amazing is that Dr. Martina Fuchs is already basically following my vision of the future of medicine – and she is taking it to the *entire* world. She is truly a visionary, and I am so happy that I had the chance to talk to her today. Her brilliance and courage and leadership all come together to push the world into higher levels of civilization. It is very exciting, and I am obviously very impressed. She is a pediatrician and the founder and chief executive of the Real Medicine Foundation in Los Angeles, California. I publish below her brief biography. [Click here](#) or on the audio icon above to listen to the editor of **World Affairs Monthly** interview Dr. Martina C. Fuchs. The Real Medicine Foundation can be found on the net at www.realmedicinefoundation.org.

Dr. Martina C. Fuchs is the Founder and CEO of the Real Medicine Foundation. She is a physician, specialized in pediatrics, who has worked and trained at Rheinische Friedrich-Wilhelms-Universität Bonn, Germany; Children’s Hospital Los Angeles, United States; Dr. Félix Bulnes Hospital, Santiago de Chile, Chile, among others. She holds a PhD in pediatric psychiatry and graduated magna cum laude from Rheinische Friedrich-Wilhelms-Universität Bonn, Germany. She holds a fellowship in pediatric intensive care and is trained in alternative medicine as well, i.e. she completed an acupuncture training and certification in Colombo, Sri Lanka. Martina Fuchs has hosted the TV series Guardian Angels, MD on TLC.

How fast is the world now changing? I would argue that this change is now very rapid, shockingly fast. Many of our institutions will be going down, and disappearing. We are building a new civilization, and we will rebuild the knowledge required for this new civilization. Thanks so much Martina for the exciting discussion. We will talk often and in detail about the goal of bringing a comprehensive and efficient medical care to the youth of the world. Without this valuable resource, the youth of the world, we will fall into poverty. I have no doubt that we will correct our mistakes and move the world forward.
